

Meeting minutes on the 8th of July

Project forum:

- Semester went well and was good.
- The online format seemed to work well and will continue into semester 2.
- Need some research students to present- they can be honours, masters or PHD.
- EOI post on the pages to see if anybody will volunteer to present.

Plan of Action if COVID affects us:

- Friday night zooms to have catch up, which we could do more relax style like games or trivia or watching a movie.
- Zooms for helping with assessment.
- Shut up and write sessions-virtual fishbowl.

Draft of events:

- CAS BBQ is a possibility but need to discuss further with them and other shared activities with them.
- Start morning teas in week 2 on Fridays at 11am
- Smash and study session- for the end of semester.
- Final BBQ to take place in week 11.
- We would also introduce the new executive for next year and do hand overs.
- Voting for executive still needs to be decided if we do in person or online. This is something we can decide at a later meeting.

First aid and other course and skill passport books:

- Zac is going to contact CIT and see what the cost will be for people if they do the course.
- Do a google form for the skills passport again so we can see who wants it and do it like the t-shirt one and know who has paid for them. Have this done by end of Bush week or week 1.

Other points:

- Tea will email ANUSA about Bush week since they have not said anything about doing the market day, but this is probably due to the COVID issues at the moment. She will do it mid-next week if she doesn't hear anything before then.
- Movie night events- maybe one at the end week 6 and one towards the end of semester
- Games nights could be an option to have throughout the semester.
- We still have the Scavenger hunt that we could do also.

- We also discuss having a pub night, which we could do every alternative week to morning tea. So, this would be the weeks that are odd numbers. This would mean we would have to book a room or tables depending on which pub we go to.
